At some time in their lives, people often “wake up” and wonder where *they* went, as though they were living someone else’s life and not their own. Have you ever wondered how to be in alignment with your core values? Track your evolution through a process where you can learn tools to further your personal evolution while discovering guideposts that mark your progression.

The material is drawn from Carla’s books, as well as her retreat work and *Navigating Your Lifepath* program. It also includes her learning through nearly 15 years of involvement with Peruvian mystic Don Américo Yábar, other indigenous healers and world spiritual traditions.

The gift we have been given is the one called possibility, whose intent offers to tie all together, creating strands of a whole life rather than a disintegrated one. The gift we have been granted is what throws light into dark places. The gift held out to us has always been present. But accepting the gift has a price — courage. It is an undying courage that allows any of us to whip the dream horse and startle awakening.
