Emergence Opportunity Day

Carla Woody, MA & Al and Marilyn Petrich, RN

Saturday, October 12, 2013

10:00 AM to 2:00 PM

Experience the combined potential of these two life-changing modalities in one FREE program!

Emergence Care allows the Power within to emerge and develop, because you must change from the inside out to have lasting effect. When the Emergence Care Practitioner enters into a state of Presence—a connection with Higher Self—the mind and body relax, letting go of deep tension to facilitate the reversal of stress-related diseases of the mind and body.

With the release of hyper-vigilance at the mind and brain level you now can literally make authentic, conscious choices regarding all facets of your life!

What to expect with Emergence Care:

- Relaxation & release of deep tension
- Increased ability to cope with stress
- Diminished reactivity, fear, anxiety
- Emotional and mental clarity
- Improved sense of self, self-worth, self-image
- Capacity to make healthier choices
- Recognizing a link between stress and mental, emotional and physical symptoms.

Carla Woody's Lifepath Design: First we go inside...

Using proven methods of NLP (Neuro-Linguistic Programming) merged with practical spirituality, we focus on going inside for alignment, defining values, engaging core energy and creating a precise blueprint for your long-desired outcomes.

... And then we go outside.

We are devoted toward going outside and paving the way in relationship to others, lifework, resources and the larger world. We go inside deeply to come outside freely and authentically.

Create a breakthrough and take a quantum leap:

- Magnify your talents and fully express them
- Establish lifework that feeds your soul
- Develop relationships that are mutually supportive
- Find yourself doing things you only dreamt of in the past
- All while living through your spiritual values.
